Subject: Gold King Trend Graphs

Forrest/Laura,

I'm attaching what I have currently for the trend graphs for surface water. The 8/11 data is preliminary – all other previous data is validated. Feel free to use these spreadsheets to update the graphs if you get new data tomorrow. The spreadsheet is built so that the graphs will automatically update. The first spreadsheet contains graphs comparing our SW samples to MCL, acute, and chronic levels for each pollutant (this is the main one we are focusing on). The second spreadsheet contains graphs for each station with each pollutant plotted over time. When you leave tomorrow just make sure to send any updates to Rob.

I'm also attaching some preliminary sediment data which includes our current recreational screening levels (column D).

Thanks!

Miranda Hodgkiss
